

▶ Introduction

Wireline brush is used to brush away the dirt, paraffin and filling rock waste on the tubing string and connectors before the downhole device is lowered in the well.

▶ Structural features

Some holes are drilled on the weight bar of wireline brush evenly and rotationally, and then the wireline is fixed with headless screws. The wireline stretching out of the body is incompact more convenient for brushing away sundries.

The wireline brush is connected with the bottom of basic tool string for use.

▶ General Technical Parameters

OD of body	Fishing neck	Connection	Length	PN
1.5 "	1.375 "	15/16UN	2ft	W23-01.00
1.875 "	1.75 "	1-1/16UN	2ft	W23-02.00
2.5 "	2.313 "	1-1/16UN	2ft	W23-08.00
4 "	2.313 "	1-1/16UN	2ft	W23-09.00
